

**IEOSA Brassica and Radish Isolation Standards for CCIA computerized pinning system  
To be implemented: 2016 Map**

(Last updated – January 2015)

\*\* - All Hybrids shall be pinned based on the **Type of Male Parent** rather than the type of completed Hybrid.

\*\* Distances should be measured from closest field points, edge to edge.

Brassica and Radish (pinned by type and color)

Type: Turnip  
Collard  
Kale  
Mustard  
Rutabaga
